EDUCATION

University of California, Santa Cruz
Bachelor of Science in Computer Science

Santa Cruz, CA
June 2023 – June 2025

EXPERIENCE

Software Engineer

July 2025 – Present

YJ Tech Ventures

Remote, USA

- Built and deployed full-stack web apps for fintech and enterprise clients using **React**, **Node.js**, and **PostgreSQL**, owning everything from the database schema and REST APIs to the frontend.
- Shipped LLM-powered features into client applications using the **OpenAI**, **Anthropic**, and **Gemini** APIs.
- Scoped projects directly with clients, wrote proposals and contracts, and supported them after launch.

Software Engineer Intern

Jan 2025 – Sept 2025

VerdeVista Investment Group

Remote, USA

- Built a **Python** automation tool that consolidated **3** separate processes into one system the team relied on daily.
- Developed APIs and a dashboard surfacing real-time investment signals, saving the team **8+** hours per week.
- Shipped through code review with unit tests and documentation, working with stakeholders to define requirements and improve data quality.

Software Engineering Intern

Mar 2023 – July 2023

4L Data Intelligence

San Ramon, CA

- Optimized **Python** data pipelines, increasing throughput **3x** per run for downstream analytics.
- Built tooling that surfaced real-time metrics to end users.
- Designed data validation checks with a cross-functional team to catch bad data early.

PROJECTS

Clovent | *Next.js, React, Node.js, Supabase, PostgreSQL, GPT-4o*

- Built and deployed a multi-tenant AI CRM for real estate agents, currently used by **5** active agents.
- Developed a **GPT-4o Vision** pipeline that extracts lead info from open house sign-in sheets.
- Built an AI assistant with multi-agent chat and **14+** callable tools for working with CRM data.
- Implemented **OAuth** and role-based access per tenant, with a **CI/CD** pipeline enabling releases every **2** days.

SentinelDocs | *Node.js, Express, Python, FastAPI, Redis, BullMQ, AWS S3, PostgreSQL*

- Built an async pipeline that stores uploaded video and documents in **AWS S3** and queues processing jobs through **BullMQ** and **Redis**.
- Developed **Python/FastAPI** workers that transcribe with **Whisper** and run GPT-based extraction, writing results to a multi-tenant **PostgreSQL** model.
- Secured the API with **JWT** auth and added end-to-end monitoring across the pipeline.

Virtualized Campus Parking System | *Next.js, PostgreSQL, Docker*

Apr 2025 – June 2025

- Led backend and frontend development across a team of **6** developers to build a digital solution for campus parking operations, replacing paper-based systems with online registration, permits, and ticket management.
- Architected microservice infrastructure using **Docker** containers with **4** distinct services communicating via **REST** and **GraphQL** APIs built with TypeGraphQL and TSOA.
- Integrated **Stripe** for payment processing, **Mailgun** for email notifications, and **OAuth** authentication, plus internationalization support for English and Mandarin.

Real-Time Drone Tracker | *C++, Arduino*

- Built a real-time multi-object tracker in **C++** using **MOG2** background subtraction and **Kalman filtering**.
- Implemented **PID** control for a servo gimbal, driving an **Arduino Nano** over POSIX serial.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript/TypeScript, HTML/CSS, SQL, GraphQL

Software: AWS, GCP, Vitest, React, Next.js, Node.js, Express.js, FastAPI, OpenAPI, PostgreSQL, BullMQ

Tools/Libraries: Docker, Git, MaterialUI, NumPy, Pandas, Scikit-Learn, Matplotlib
